

“The Sky Hook Model 8557 is working beyond our expectations... We have two units and are looking at purchasing a third because it functions so well for all of our air conditioning compressor installations.”

-Jeffrey A., Medical Systems customer

Attitude is Everything!

Lifting Applications

Perfect for any lifting and moving application. Ideal for tight, hard-to-reach locations where you can't get other lifting devices or multiple people to assist you.

industry leader since 1969

SKY HOOK

MODEL 8557 w/MOBILE BASE

The **Sky Hook Lifting Device Model 8557** is a lightweight portable, manual lifting device ideal for tight, hard-to-reach areas where you can't get other lifting devices or multiple people to assist you. Model 8557 is the solution for lifting and transporting items off of and onto benches or pallets and is great for general material handling such as pulling out pumps, motors, and other parts. Model 8557 is ideal for maintenance and service departments and costs less than a forklift or crane—with the added benefit of maneuverability.

It's easy to take it just about anywhere—even to a job site— because Sky Hook Model 8557 easily disassembles into sections weighing 34 lbs. or less. The added value of 360° rotation with the ability to straddle the corner of benches, pallets, etc. makes it the perfect portable, manual lifting device for you.

Back injuries and manpower are reduced because Sky Hook Model 8557 can be used by one person to safely lift and position up to 500 lbs. For specialty applications, custom units of Sky Hook Model 8557 are also available.
